PROFILE

Software Engineer with experience in automation and backend development, currently working on building AI-based applications and workflows. Skilled in working with APIs, data processing, and automation systems, with a growing focus on applying AI to solve real-world problems. Interested in building practical, efficient solutions and continuously learning new technologies.

SKILLS

- **AI & Machine Learning:** LLMs, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, OpenAI API
- **Programming:** Java, Python, SQL, JavaScript
- **Automation & Testing:** Selenium, Appium, Playwright, Robot Framework, Carina Framework, API Testing, UI Testing, End-to-End Testing
- **Backend & APIs:** REST APIs, FastAPI, API Automation, Postman
- **Databases:** MySQL, PostgreSQL, SQLite, ChromaDB (Vector DB)
- **DevOps & Tools:** Jenkins, Docker, Git, GitHub Actions, CI/CD Pipelines
- **Web:** HTML, CSS, React JS

EDUCATION

B.Tech in Computer Science Engineering

Prof Ram Meghe College of Engineering and Management, Amravati

June 2020 – June 2024 GPA: 9.49

EXPERIENCE

Software Engineer (Automation)

QualityKiosk Technologies Pvt Ltd

Jan 2024 – Present Navi Mumbai, Maharashtra

- Designed and developed **automation systems** using Java and Python to streamline workflows and reduce manual effort by **60%**.
- Built **data validation and processing pipelines** for large datasets (10,000+ records), improving data accuracy and system reliability.
- Developed **API-driven workflows** and backend validation systems using REST APIs, enabling efficient data exchange and integration.
- Integrated automation solutions with **CI/CD pipelines (Jenkins)**, improving deployment speed and reducing release cycle time.
- Collaborated with cross-functional teams to design scalable, automation-first solutions, improving system performance and maintainability.

PROJECTS

AI Business Copilot

GitHub: Link | **Live:** Link

2026

- Built an AI-powered assistant using **LLMs** to enable natural language interaction with business data.
- Implemented hybrid data access by combining **SQL querying** and **RAG-based retrieval (ChromaDB)**.
- Developed multi-agent workflows using **LangChain and LangGraph**.
- Designed a **FastAPI backend** with a **Streamlit UI**.

Email Automation Bot (AI)

GitHub: Link

2025 – 2026

- Built an AI-powered email automation system using **LLMs**.
- Integrated **Gmail API with OAuth2**.
- Designed automation workflows with real-time alerts.

HSBC – MyTablet Staff Application

Software Engineer (Automation)

2025 – Present

- Developed automation frameworks using **Selenium and Java**.
- Improved test coverage and reduced manual testing.
- Integrated **CI/CD pipelines** for continuous deployment.

CERTIFICATES

- Python HackerRank - Link
- Java HackerRank - Link

AWARDS

- Winner - HackSquad (Global Open Source Competition)
- 1st Rank - Data Analysis Competition
- 1st Rank - GameOfCode Coding Competition
